

INSTALLATION INSTRUCTIONS:

IMPORTANT SAFETY NOTES & WARNINGS

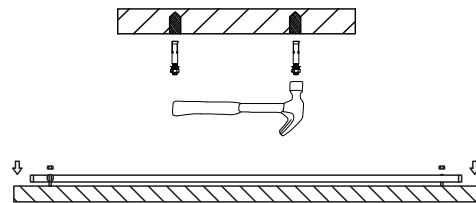

- Product should be installed by a certified electrician in accordance with applicable national, state, and local building and electrical codes
- Failure to properly support the fixture may result in damage or injury, for which the manufacturer does not assume responsibility.
- Input Voltage Range: 100-277V or 120-347V, 50/60Hz. Operating outside this range may cause lamp failure. Ensure correct input voltage before use.
- Operate temperature between -20°C and 50°C. Exceeding this range shortens product life.
- Turn off electrical power at fuse or circuit breaker box before wiring fixture to the power supply.
- Keep the product away from corrosive substances.

INSTALLATION:

Step 1: Drill holes based on the given hole sizes

Step 2: Hammer the screw into the hole, then attach the ceiling cover and tighten the nut

Step 3: Install the main body and tighten side screws.

Step 4: Installation complete.
