

⚠ WARNING: May result in serious injury or death. Turn off power at circuit breaker before installing the unit.

ECO SENSOR INSTALLATION INSTRUCTIONS

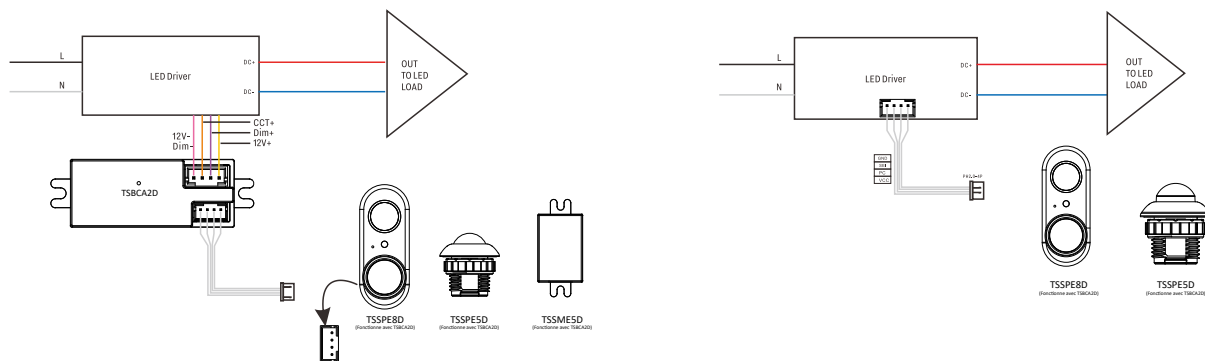

1. Please call a licensed electrician for installation.
2. The device may require slight modifications if an occupancy sensor is added to the TSBCA2D controller:
 - TSSPE8D: The device requires an oval cutout as shown to the right.
 - TSSPE5D: Drill a 1/2" KO hole in the fixture housing and insert the sensor.
3. Ensure the fixture can be dimmed to 0-10V and that the driver has an AUX output.
4. Screw the sensor into the receptacle and ensure a tight connection. Ensure the rubber gasket touches the exterior surface of the fixture.
5. Attach the lens to the sensor and turn the lens module clockwise to ensure it locks into place.
6. Refer to the diagram below for wiring. 7. Restore power to the source.
8. Activate the sensor via the Technilight Smart app.

INSTALLATION INSTRUCTIONS

1. TSBCA2D: The TSBCA2D controller must be installed in a dry environment. If installed inside an outdoor luminaire, it must be installed inside the luminaire.
2. TSBCA2DL (with external antenna): The antenna must be placed as far away as possible from the luminaire's metal casing (if the casing is fully enclosed, drill a hole and expose the antenna as far as possible).
3. TSBCA2DL: The antenna must be installed vertically.

WIRING

TIPS: This Bluetooth device is compatible with Technilight Smart lighting control system only.
